DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11 and 13-15, drawn to a printer.

Group II, claim(s) 12 and 16, drawn to an image receiving material.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a printer including a detector and a device for determining at least one of a spacing between two markings and a width of a marking. Group II is directed to an image receiving material which inherently does not have a detector or a device for determining at least one of a spacing between two markings and a width of a marking.

3. A telephone call was made to Jeremy Kriegel on 3/30/2010 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2854

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
